

LEVITT AMP TOOLKIT

ARTIST AGENCY LISTING

Booking artists for your Levitt AMP Music Series requires that you contact and coordinate with their representing agent. Agents are responsible for booking performances, negotiating contracts, and routing shows for the artist.

Agencies can operate differently from one another. For example, some agencies follow the “regional” model where you contact a particular agent who books artists in specific regions. Other agencies follow a “representing agent” model where you contact different agents within the agency depending on which artists you are considering for your series. It is important to note that some agencies represent both established artists whose fees may be in the tens of thousands of dollars to upwards of \$100,000+ as well as emerging artists whose fees may be under \$5,000.

Since Levitt AMP concerts will take place in different markets, agency contacts will vary based on regions and artists of interest. This document serves as a starting point—your artist booking process will require individual customization. The agency websites listed below consist of agencies that permanent Levitt venues may use and recommendations from previous Levitt AMP grantees. There will likely be other agencies you will work with when booking artists for your concert series.

If you do not find specific information on an agency website regarding their artists and agents, feel free to call the general agency number and speak with someone who can direct your inquiry to the appropriate agent. Available email addresses for agents who represent artists under \$5,000 are also provided below.

If you have any questions, please email us at amp@levitt.org.
